Dhaka, Bangladesh

Professional Summary

Junior Full Stack Developer with hands-on experience building responsive and scalable web applications using React, Next.js, TypeScript, Node.js, Express.js, Laravel, PostgreSQL, and MySQL. Experienced in developing RESTful APIs, database management, authentication, CRUD operations, and performance optimization. Experienced in developing maintainable full-stack features for healthcare and management systems in collaborative environments.

Education

University of Information Technology and Sciences (UITS)

Oct 2021 – Sept 2026 | Baridhara, Dhaka

Bachelor of Science in Computer Science and Engineering

Experience

Junior Full Stack Developer – Synex Digital

Dec 2025 – Present | Dhanmondi, Dhaka

- Built and maintained full-stack features for healthcare and management systems using **Next.js**, **Node.js**, **Express.js**, **PostgreSQL**, and **Laravel**, improving application **performance by 25%** and reducing **API response time by 30%**.
- Developed and integrated **15+ RESTful API endpoints** for authentication, appointment scheduling, and data management, **reducing data inconsistency issues** and improving system reliability.
- Optimized UI performance by implementing reusable components and efficient state management, **decreasing page load time by 20%** and enhancing overall user experience.

Intern – Synex Digital

July 2025 – Nov 2025 | Dhanmondi, Dhaka

- Assisted in building frontend interfaces and backend APIs for real-world applications, **contributing to 3+** production-level modules across healthcare and management systems.
- Collaborated with team members using Git workflows (branching, pull requests, merging), **resolving 20+ bugs** and contributing to smoother feature releases and testing cycles.

Skills

- Frontend: HTML5, Tailwind CSS, JavaScript, **TypeScript**, **React.js**, **Next.js**, Framer Motion
- Backend: **Node.js**, **Express.js**, PHP, **Laravel**
- Database: **PostgreSQL**, **MySQL**, SQLite, **MongoDB**
- Tools & Others: Postman, Git, GitHub, **Prisma**, Docker, RESTful APIs, Responsive Design, API Integration

Projects

Health App (Full Stack Application)

GitHub: https://github.com/Tanim-Bin-Aziz/health_server | https://github.com/Tanim-Bin-Aziz/health_app

- Developed a scalable full-stack healthcare web application using **Next.js**, Tailwind CSS, **Node.js**, and **Express.js**, enabling users to browse doctors, book appointments, and access role-based dashboards.
- Optimized API performance and component reusability, improving load time and development efficiency by **25–30%**.

Hotel Management System (Laravel Application)

- Built a scalable hotel management system with **Laravel** and **MySQL** to manage bookings, customer data, and administrative workflows.
- Implemented secure authentication, CRUD operations, and multi-role access control, increasing operational efficiency by **35%** and ensuring data integrity.
